

Innovation and Technology Intern

Project Title	Innovation and Technology Intern
Project Summary	CIA is dedicated to creating a workplace culture in which thinking, creativity, and innovation are encouraged. We seek an intern who can assist in identifying best practices from academia, government, and the private sector so that we may apply this research toward internal programs.
Country	United States

Project Description

As technology and innovation are closely intertwined, we're looking to grow the digital acumen of our analytic workforce. Our intern will help to identify best practices and training materials to assist in introducing analysts to more quantitative types of work, basic programming, and data visualizations.

- Research, draft, and edit timely and accurate fact sheets, presentations, blog posts, digital videos, graphics, and podcasts related to innovation, creativity, cognition, and mindfulness for an internal CIA audience.
- Support staff in creating learning materials to promote digital literacy within our analytic workforce. Examples include identifying/creating short videos demonstrating basic programming skills; writing blog posts about how to automate boring tasks; or creating a gallery of visualizations exemplifying data-driven storytelling.
- Investigate ways in which data analysis & visualization are spurring new approaches to analytic insight & handling large volumes of information.

Required Skills or Interests

Skill(s)
Coding
Data analysis
